

ONE STOP SYSTEMS TO EXHIBIT AT FLASH MEMORY SUMMIT 2016

July 21, 2016 - One Stop Systems will be exhibiting at Flash Memory Summit on August 9-11, 2016 at the Santa Clara Convention Center in Santa Clara, CA. Visitors can see the latest technology in Flash Storage at the OSS booth.

Flash Memory is characterized by high performance with low latency and it's taken enterprise storage by storm. One Stop Systems will be exhibiting our entire line of Flash Storage Arrays including new all-in-one flash storage appliances being announced at the show.

About Flash Memory Summit

Flash memory is a key technology enabling new designs for many products in the consumer, computer and enterprise markets. The Flash Memory Summit is the only place where you will hear the people making these products happen! Network with companies and people that will create the next generation of hardware and software at the Flash Memory Summit.
