

# Demand Your Storage Security Today

Manuel A Offenberg  
Principal Engineer  
Seagate Technology

# Standards-Based Storage Security

- The Technology: SED across the board
  - Data-at-Rest protection, e.g.
    - NIST FIPS-197 /w SP800-38E
    - Trusted Computing Group Storage specifications
  - Cryptographic Erase, e.g.
    - NIST SP800-88 Rev.1
- The Implementation: 3<sup>rd</sup> party assurance
  - CAVP certification of algorithms
  - CMVP FIPS-140 validation of devices
