

Flash Memory Summit

UFS Card Socket

Zhineng Fan
Amphenol

UFS Card is Available

- **Available through connector distributors**
- **19 pin UFS/Micro SD design**
 - Pin1~10,11,12,19 for UFS card use. Fully compatible with JEDEC SO-022A specification.
 - Pin11~19 for Micro SD use.
- **Optimized contact structure and shape to achieve high speed performance.**

Flash Memory Summit

UFS Applications

Why do we need UFS?

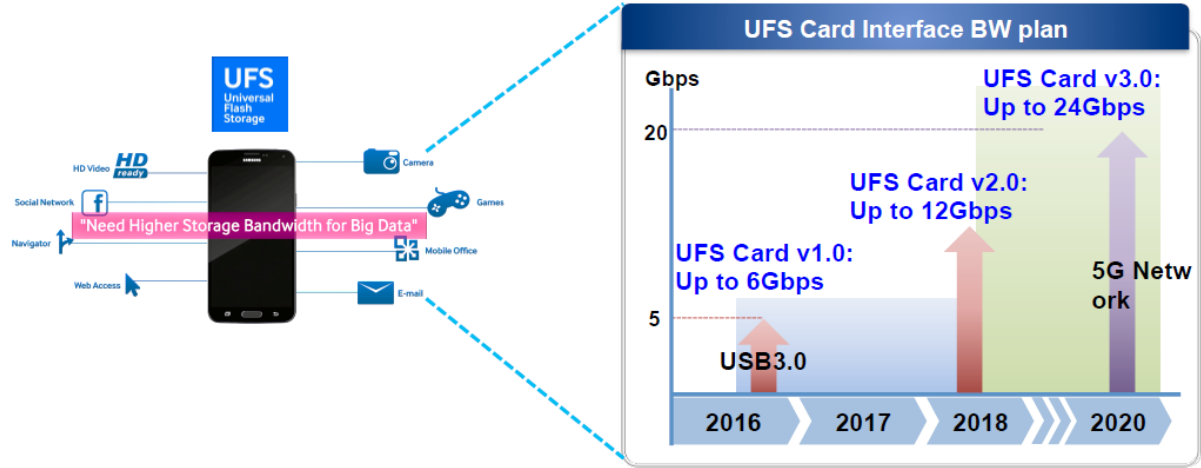

SPEED

The Future

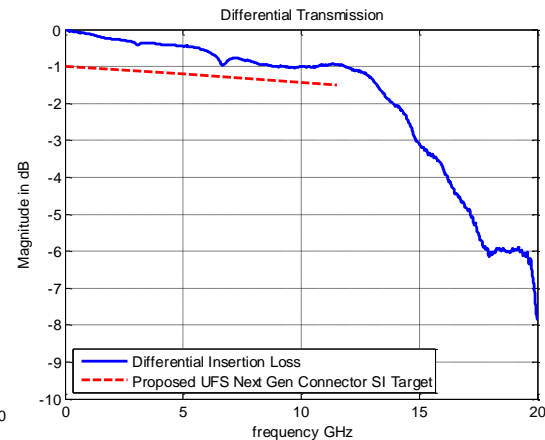

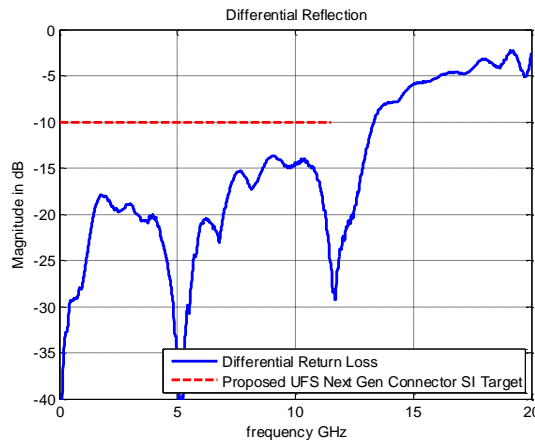

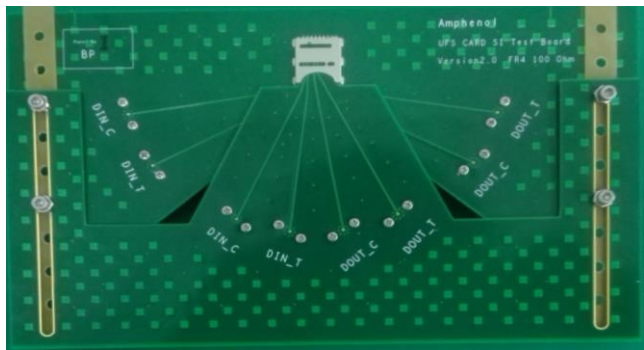

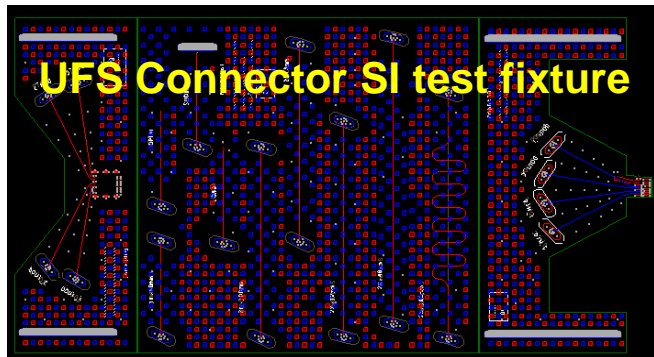

UFS Card Is The Way To Go for Future 5G Standards Proprietary

Performance Ready For Next Gen

Flash Memory Summit

Amphenol design meets and exceeds the required UFS card socket requirements. The measurement data illustrate the performance ready for next generation development.
